Navigating the Site

Where to Start

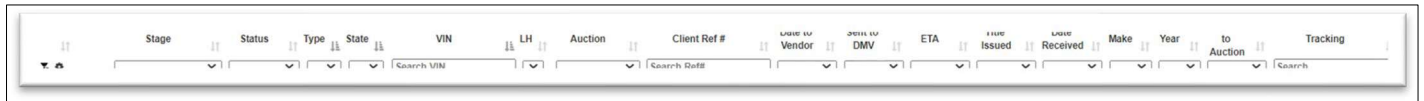

After logging into your “Group” page in the MyDMV.Pro platform, you will automatically be brought into your “My Requests” queue.

The different queues are all listed on the left-hand side of your screen under the “My Services” tab – screenshot to the left:

In this Quick Reference Guide, we will cover the two most important queues for your attention:

1. Master List
2. Form Entry

Master List Status Fields

The image shows a horizontal search and filter bar for the Master List. It contains various fields with dropdown arrows and search icons. The fields are: Stage, Status, Type, State, VIN (with a Search VIN icon), LH (with a Search LH icon), Auction, Client Ref # (with a Search Ref # icon), Date to Vendor, Date to DMV, ETA, Title Issued, Date Received, Make, Year, Shipped to Auction, and Tracking. There is also a general Search icon at the far right.

The “Master List” is the most important queue in the MyDMV.Pro system. This list contains all requests for your group including both active and completed requests. The list contains all the relevant information for each request and is fully searchable.

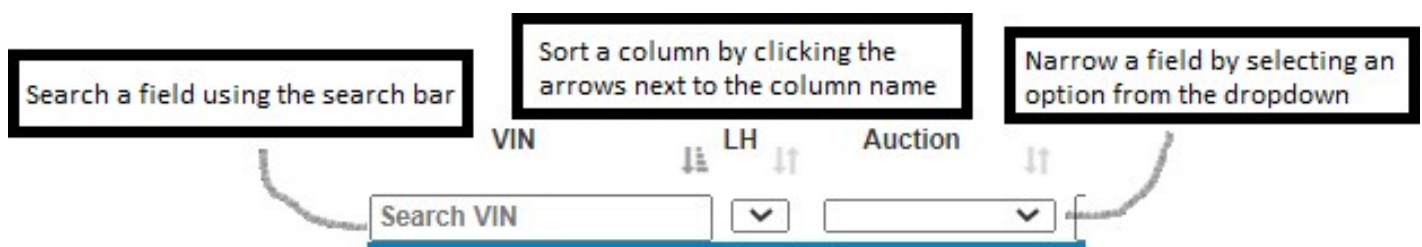

The Master List fields and search features are detailed below.

- Date to Vendor – Date the request was sent to Maggard via the MyDMV.Pro platform
- Sent to DMV – Date the application was submitted to DMV for processing
- ETA – Estimated time for the title to be received by Maggard or Client
- Title Issued – Date the title issued from the state
- Date Received – Date the title was received back in the Maggard office (if applicable)
- Shipped to Auction – Date the title was sent to the auction
- Tracking – Tracking # to the auction or client office
- Notes – You can view the Maggard notes on a record in real time by clicking the notes in the “notes” column

Search for a Record

You can search by the VIN or the last 6 digits in the VIN field

Additionally, all the fields are sortable based on their data type. Use the fields at the top of each column to narrow your lookup by date, auction, etc., or use the up and down arrows to sort the column numerically / alphabetically depending on the field.

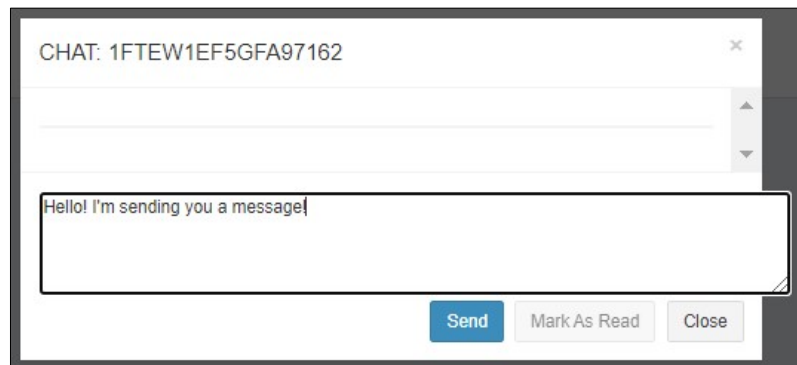

Tools

Every record has a Chat, Attachment, and Duplicate Record Alert feature. These features are easily accessed from the Master List.

Chat

To open the Chat window, click the chat bubble on the left-hand side of the record. From here, you can send a chat directly to the Maggard team.

Chat bubbles are also color coded to indicate the chat status.

Be on the lookout for any RED chat bubbles as this means Maggard has sent your team a message on that record!

YELLOW – Your team has sent a chat that Maggard has not yet read

GREEN – All chats have been read by Maggard and Client

RED – a new chat is waiting for you to read.

A chat bubble will remain **RED** until you click the button “Mark As Read” on the chat window

Helpful tip

In the Master List, click the sort arrows above the chat bubble column.

This will bring all of the **RED** (unread) chats to the top of the list!

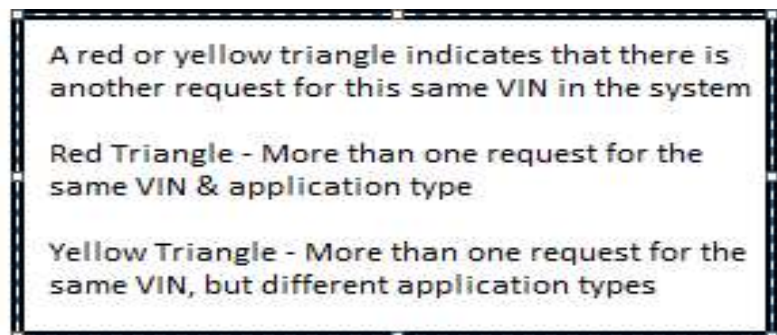

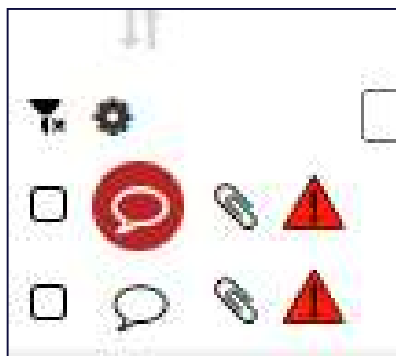

Duplicate Record Indicator

If you see a red or yellow triangle next to a record in your list, this means there is another request for the same VIN in the system.

Yellow Triangle – There is another record with the same VIN in the system, but it is for a different application type. For example, you may have a request for an inquiry and a duplicate title for the same VIN. The yellow triangle should be an indication to make sure you are referencing the correct record.

Red Triangle - There is another record with the same VIN in the system, with the SAME application type. The red triangle should be an indication to make sure you are referencing the correct record. If a request is submitted twice, we will cancel one record after confirmation, but make sure you are referencing the correct record.

If you see a triangle next to a record, make sure you are communicating on the correct record.

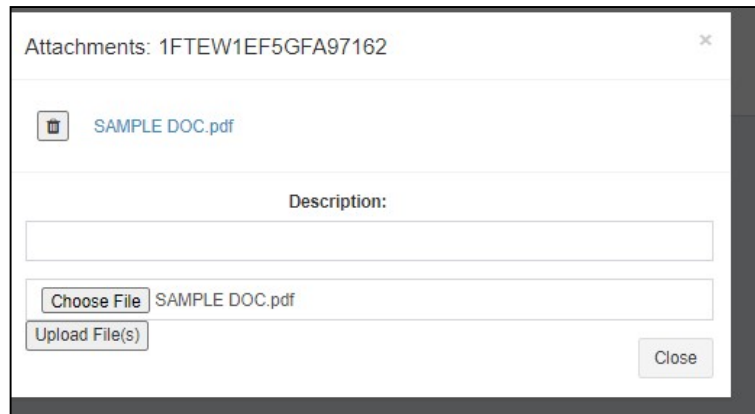

Attachments

By clicking the paper clip, you can either upload documents to a record or view documents that have been uploaded to the record.

To upload a document:

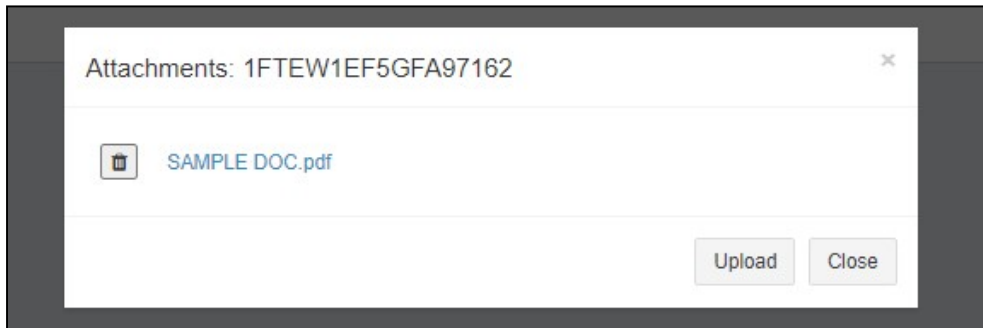

1. Click the paper clip
2. Click "Upload"
3. Click "Choose File"
4. Select your document
5. Click "Upload File(s)"

The screenshot shows a dialog box titled "Attachments: 1FTEW1EF5GFA97162". Inside, there is a paperclip icon next to the text "SAMPLE DOC.pdf". Below this is a "Description:" label followed by an empty text input field. At the bottom, there is a "Choose File" button, a text input field containing "SAMPLE DOC.pdf", an "Upload File(s)" button, and a "Close" button in the bottom right corner.

To view a document:

1. Click the paperclip
2. Click the file name to open

The screenshot shows a dialog box titled "Attachments: 1FTEW1EF5GFA97162". Inside, there is a paperclip icon next to the text "SAMPLE DOC.pdf". At the bottom right, there are two buttons: "Upload" and "Close".

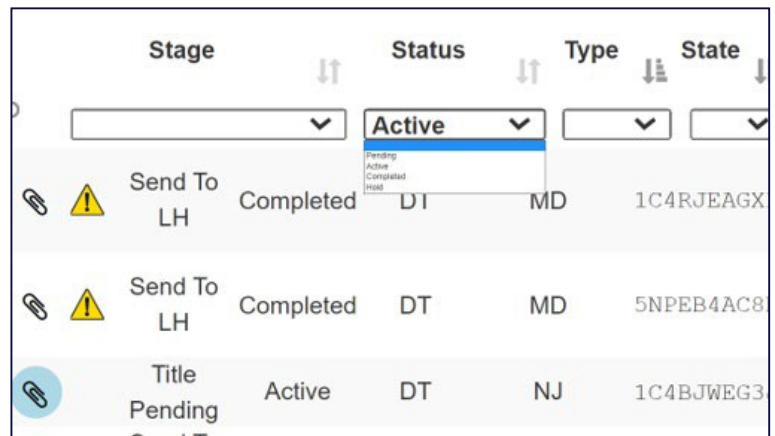

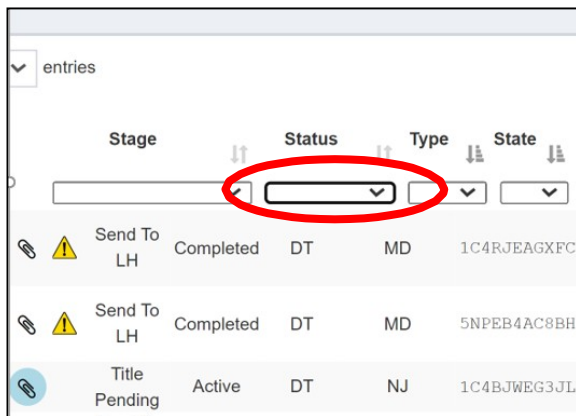

Accessing Archived Data

Two weeks after records are marked as completed, cancelled, or otherwise finished, they will move to “Archive”.

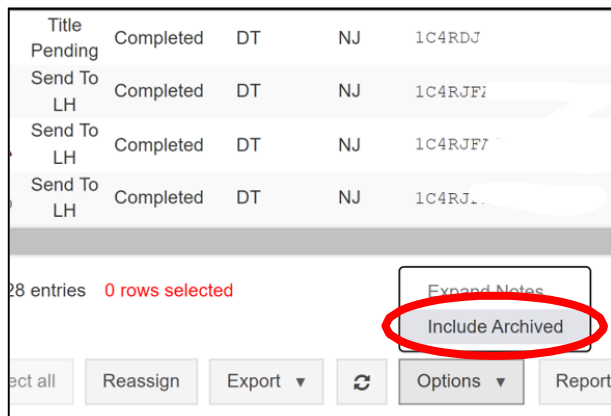

This means they will not appear in normal searches unless you include archived records in your search. You can access your archived records in the “Master List”.

To access Archived Data:

1. Navigate to the Status filter in the Master List
2. Choose the blank field in the Status bar filter

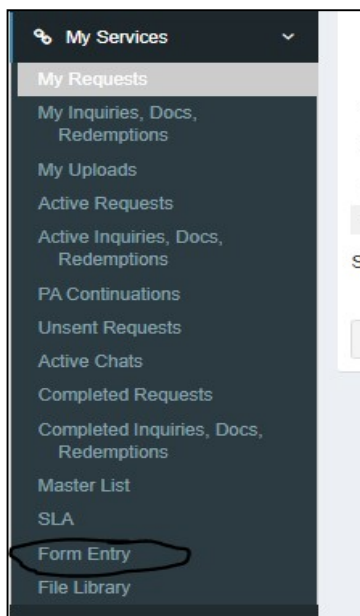

3. After choosing the blank field, navigate to the bottom of the Master List and view the Options Filter
4. In the Options filter, choose “Include Archived”

TIP – after choosing “Include Archived” in the Master List, the portal will pull all records ever submitted. This will cause a performance lag as the system sorts through all records

Submit a Request

To submit an individual request, use the “Form Entry” button on the left-hand side of your screen under “My Services”

On the form entry page, you will see drop down menus for “State” and “Application Type”. Begin your submission by selecting an option from both of these lists to identify the request you would like to submit.

A screenshot of the form entry page. It features two dropdown menus: 'State' and 'Application Type'. Below these menus is a blue button labeled 'Create Form'.

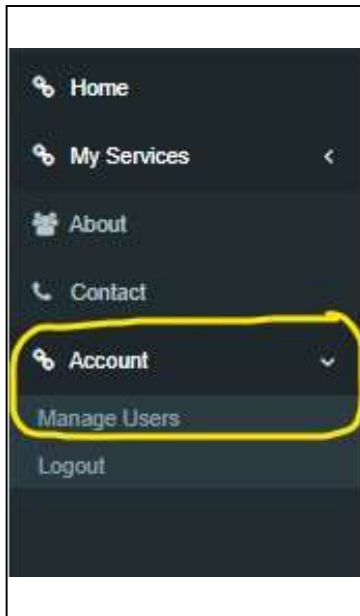

After selecting from the drop downs, click “Create Form”. This will prompt the system to create a form for you to fill in with required info. Example below:

A screenshot of the form entry page after clicking 'Create Form'. The page shows a title bar with 'State' set to 'New York' and 'Application Type' set to 'Duplicate Title'. Below the title bar is a section titled 'New York - Duplicate Title'. This section contains two main parts: 'Vehicle Description' and 'Owner Information'. The 'Vehicle Description' part includes fields for 'VIN', 'Year', 'Make', and 'Title Number'. The 'Owner Information' part includes fields for 'Owner Name', 'Client Reference Number', and 'Auction'. At the bottom of the form is a button labeled 'Send Form to Vendor'.

Fill in the form with the required info and click “Send Form to Vendor”. This will submit your request to Maggard.

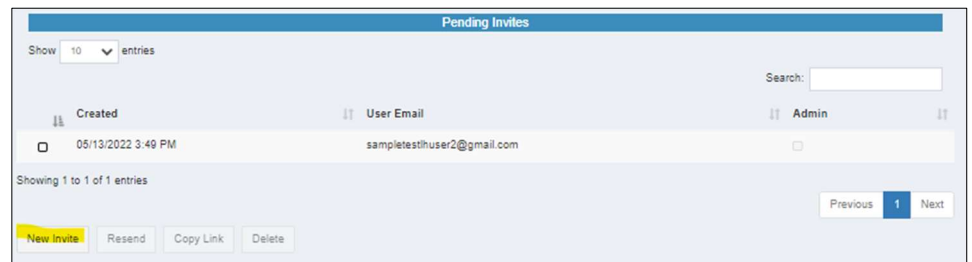

If you want to double check that your submission was successful, you can look up the VIN in your “My Requests” or “Master List” tab(s) on the left-hand menu. If the request is showing, then it was successfully submitted to the Maggard Team!

Manage Your Group Users

To invite additional team members to your MyDMV.pro group, navigate to the Account page on the left-hand side of your screen.

On the Manage Users page, you will find a list of users in your group.

To invite a new user to your group with the New Invite button at the bottom of the page.

After clicking this button, a new page will guide you to enter the email of the potential new user and send the invite to that email.

A screenshot of the 'UserEmail' form in the MyDMV.pro web interface. It shows a text input field for the email address, a checkbox for 'Make group admin', and a 'Send Invite' button highlighted in yellow.

At this time, you may also make the invitee an Admin for your group.

The invited user must accept the invitation to complete the Sign-Up process.
